DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 4, 6, and 8-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or fairly suggest that said determination information is at least one of a conditional expression which determines another element type, or a specification of another element type, both complying with the selected element type, which would otherwise be caused when a first element type has been selected, and an incidental expression having information to be used for preventing reflection of information about a specific constituent element or element type in response to the selected element type, which would otherwise be caused when a second element type has been selected, in combination with the remaining features and elements of the claimed invention.

Mateau merely discloses that the process accounts for the interrelationships of every part with every other part in the mold manufacturing line and makes certain specific modifications according to the specific application to reach an optimal mold manufacturing line design solution (e.g., [0031]). However, Mateau does not specifically disclose automatically determining another element type (or part) complying with the selected element type based on this interrelationship. Mateau just discloses that the design is continuously

validated and maintained to provide a working tooling assembly line at the end of the design process (e.g., [0056]).

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
